

The mission of MCHC is to improve maternal and child health through the collaborative efforts of individuals, providers, and policy makers.

MCHC PROGRAMS

Healthy Start

A countywide prenatal and postpartum home visiting and support program that increases opportunities for healthy pregnancies, safe deliveries and prompt enrollment of children into pediatric care. Bilingual, bicultural outreach workers provide emotional support, health education, access to prenatal care, and linkages to other medical and social services.

Family Benefits Program

MCHC coordinates a countywide initiative to help eligible families apply for Medical Assistance or CHIP for health insurance, and SNAP (food stamps) for food support. Our staff and community partners enroll more than 2,500 individuals each year into these important programs.

Kennett Family Center

Parent Educators trained in the evidence-based "Parents as Teachers" model provide home visiting, developmental screening and early learning skills for families with children up to age five to promote increased developmental and social skills and school success.
